

CARBON FOOTPRINT CALCULATORS FOR THE COMMUNITY

Knowing where and how your energy is spent is the first step to effectively manage your costs and reduce carbon emissions. Start by using a carbon calculator to measure your carbon footprint, and see how small changes can make a difference. (Note: Results may vary between greenhouse gas (GHG) calculators; use them as guides to help you prioritize areas where you can cut your emissions.)

If you are...	We suggest...	Developed By:	Here's what you will find:
In a hurry	Zerofootprint One-Minute Calculator (Canada)	Zerofootprint	A quick snapshot of your basic lifestyle habits and associated emissions. Go to: http://www.zerofootprint.net/individuals/one-minute-calculators/
Looking to make small changes	One Less Tonne (Canada)	Pembina Institute	An online interactive tool that measures the amount of carbon and money you have saved from their 20 action items. Go to: www.onelesstonne.ca
	Eco-Action Calculator (Canada)	Earth Day Canada	An online interactive tool. Practical tips, checklists, and saving reports in terms of carbon emissions and money saved are readily available. Go to: http://calculator.ecoactionteams.ca/
	Earth Day Network Footprint Quiz	Earth Day Network	An online interactive tool, fun and easy to use; provides results with pie-charts, tips and solutions, and what-if scenarios. Go to: www.earthday.net/footprint2/index.html
A youth at home	Zerofootprint Youth Calculator (Canada)	Zerofootprint	An online interactive tool that tailors to youths' lifestyle; includes discussion forum and teachers' resources. Go to: www.zerofootprint.net/youth/learn
A child at home	Zerofootprint Kids Calculator (Canada)	Zerofootprint	A simpler version of the Youth calculator, tailors to younger children; link to The Greens, an online cartoon show that teaches environmental stewardship. Go to: www.meetthegreens.org/features/carbon-calculator.html
